## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a circuit for driving cold cathode tubes having, inter alia, a resistor/capacitor network which directs an oscillator to achieve a first resonance frequency to drive said resonance elements and causes said cold cathode tube to conduct and thereafter said resistor/capacitor network directing said oscillator to achieve a second resonance frequency to drive said resonance elements and illuminating said cold cathode tube (claims 1, 11 and 14). The remaining claims 2, 3, 5-9, 12 and 16 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1-3, 5-9, 11, 12, 14 and 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
